

# Maxi-major™ 200

## Portable Stair Climber

The Stairline Maxi-major™ 200 Stair lift is a free standing, hydraulically operated platform stair climber, designed to enable a single operator to effortlessly move wheelchair users up or down stairs, for use in buildings without operational elevators or wheelchair access.

### Features:

- Simple and quick to deploy.
- Integrated loading ramps.
- Hydraulically operated wheelchair platform, enables the user to remain vertical when travelling on stairs.
- Battery operated motorised track system moves on stairs with no strength needed by the operator.
- Auxiliary wheels enable the operator to move the unit on landings and across flat surfaces indoors and outdoors.
- Simple operator controls.
- Safety key operated.
- Four wheelchair securing straps.
- Integrated passenger safety belt.
- Side safety rails
- Adjustable head rest.
- Charge indicator.
- Rechargeable battery pack and charger.
- Stair angle gauge.
- User handbook.
