

WERKSITZ

PU LAB CHAIR

The Werksitz Swivel Lab Chairs are ideal for use in areas where hygiene and cleanliness are required such as laboratories, doctor surgeries and dental practices. Ergonomically designed to help promote healthy, dynamic seating.

Features:

- Fully supportive, tilt-able seat and backrest.
- Seat height adjustment using a safety gas spring/hydraulic system.
- Polished diecast aluminium five-star base.
- Modular design - can be built to your own specification.
- Seat and back rest made from thermos-sensitive, viscoelastic PUR integral foam, which moulds to the shape of the user's body.
- Foam is also fully perforated to provide continuous air circulation for the ultimate seat climate and comfort while sitting in any work area.
- Seat and backrest cushions can be removed and interchanged, enabling them to be fully washed and disinfected, helping to ensure optimum occupational hygiene - especially in multi-shift operations.
- Base model configurations available - high chair with a step-up bar/footrest on glides, or, low chair with load dependent breaking castors.
- Extras available at an additional cost, include load dependant breaking base castors (for the high chair), trumpet base, swivel lock and armrests.
