

EVAC-U-TRAC CD7

The Evac-U-Trac CD7 evacuation chair, enables individuals with a disability or injury, to be moved down stairways quickly and safely during an emergency. Its patented speed governor and braking system allows a small attendant to easily evacuate a larger passenger.

Features:

- Quick and easy deployment for immediate use.
- Carries up to 136kg.
- Passengers weight helps to move the chair down stairs, while the operator controls the speed of the decent.
- Hydraulic speed governor system.
- Failsafe braking system that will stop and hold a fully loaded Evacu-Trac on the stairs.
- Adjustable user safety straps, located around the torso and lower leg area.
- Stable and self-supporting for safe loading.
- Durable tracks grip stairs securely.
- The track grips the stairs, regardless of the stair construction material.
- Easily stores in a secure area when not in use.
- Requires minimal maintenance.
- Supplied with CD ROM and Instruction Manual
