

REDBACKS®

KNEELER PAD

Ergonomically designed kneeler Pad developed to offer a high level of support and protection, to people who spend prolonged periods kneeling while undertaking tasks at low levels.

Featuring Redbacks® patented, SATRA award winning, leaf spring cushioning Technology - scientifically proven to disperse pressure and distribute the weight load evenly throughout the pad.

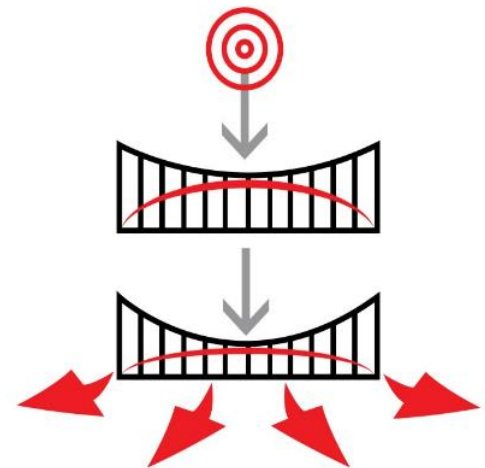

Features:

- Engineered to give support to the knees by suspension rather than compression
- 28 multi directional Redbacks® springs
- Scientifically proven to reduce point pressure and distribute weight - enabling people to work longer
- Can be used for kneeling, sitting and standing
- Long lasting anti-fatigue support
- Suitable for dry and damp conditions
- Penetration resistant waterproof base
- Slip-resistant base to keep mat in place in use
- Thermal protection from warm or cold surfaces
- Zipped cover for easy removal of internal pad
- Internal pad can be used without cover
- Carrying handle
- Fully washable at 30°C
- 100% recyclable pad

Specifications:

Weight: 1.4kg approx.
 Dimensions: Length 45cm x width 27cm x depth 3.45m
 Pad Material: TPE 100% recyclable
 Cover Material: Neoprene, SBR, CR, PET, nylon, Polyester

Product code: RED003
